LEAD FRONTEND ENGINEER · PRODUCT & DESIGN ENGINEERING

7+ years building production web platforms across enterprise AI, consumer marketplaces and independent products, with strengths in frontend architecture, product delivery and interaction design.

EXPERIENCE

OUTVERSE · Lead Frontend Engineer · 2021 – Present

PROGRESSION · MID → SENIOR → LEAD

Enterprise AI platform · Frontend architecture, product delivery and technical direction

- Set frontend direction across the agent operations platform and embedded customer widget, supporting millions of production interactions.
- Designed and shipped intent, policy, tool, escalation and review workflows that made agent behaviour easier to configure and investigate.
- Built the real-time widget platform across iframe and host APIs, WebSockets, hand-offs, localisation, analytics and responsive branding; one enterprise deployment tripled support capacity.
- Separated the widget into an independently deployable app and created the typed core and design system shared by the web app and widget.

TREATWELL · Frontend Software Engineer · 2019 – 2021

European beauty marketplace · React product development

- Built Lookbook from greenfield with a small cross-functional team, connecting real salon work and visual filters directly to bookable services.
- Shipped venue, review and booking journeys across a localised React and TypeScript marketplace, adding Cypress visual regression and Jest/Testing Library coverage.

INDEPENDENT PRODUCT

STREAMING CALCULATOR · Owner & builder · Ongoing

Creator-tools platform · Product, design and engineering · streamingcalculator.com

- Grew one royalty calculator into 30+ calculators and comparison tools, reaching ~20k monthly views and earning ~800 backlinks.
- Built the platform on Cloudflare with prerendering, first-party analytics and contextual sponsor placements; own product, interface design, engineering, technical SEO, partnerships and revenue.

CAPABILITIES

Frontend TypeScript, React, Svelte 5/SvelteKit, Tailwind, WebSockets, iframes, accessibility and performance

Product & leadership Technical direction, interaction design, design systems, scoping and cross-functional delivery

Platform & quality Playwright, Cypress, Vitest/Jest, Storybook, Chromatic, GitHub Actions, Sentry and PostHog

EDUCATION

QUEEN MARY UNIVERSITY OF LONDON · 2016 – 2019

BSc (Hons) Software Engineering for Business · **FIRST CLASS HONOURS**
